## Generator Annual Maintenance

# \$295

\*Air cooled generators only.

### INCLUDES:

#### Air/Oil Filters

Inspect/replace air and fuel filters and spark plugs as needed. Change engine oil and filter, check exhaust system, lubricate fittings, and inspect governor linkage, oil level, and controls.

#### Battery Check

Check for correct voltage and frequency, battery level, operation of battery, charger, flex, connection, and mounting, inspect electronic connections.

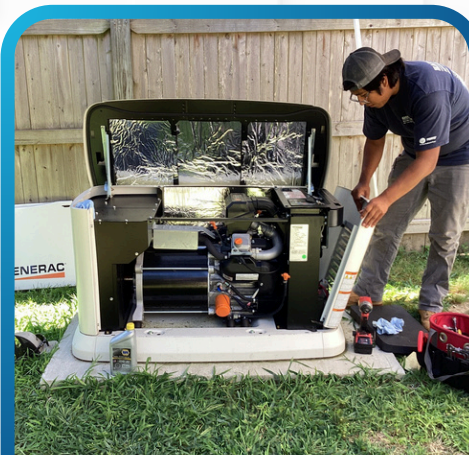

#### Simulated Outage

Check auto Start dash stop mode, simulate a safety shut down (on applicable units) and outage to check operation of ATS.

#### Cleaning

Removed debris in/around unit and clean unit exterior, repair minor leaks (ex. loose fittings)

**A generator isn't a  
"Set it and forget it"  
purchase.**

It requires annual maintenance, just like the other systems in your home, to ensure that it's ready to start up whenever you need it.

StefaniPlumbing.com

Stefani Plumbing, Heating & Cooling employs experienced and certified technicians for Generac generators. This agreement has been prepared to provide an annual maintenance/service plan that ensures the installed equipment is maintained to the highest possible level of readiness in the event of an outage. Stefani utilizes OEM parts whenever possible as outlined by the manufacturer. Liquid cooled generator maintenance is charged a time and material rate.

NOW OFFERING

# Mobile **Link**™

Providing the Ultimate Peace of Mind

Mobile Link is the cellular remote monitoring system from Generac that lets you check on your standby generator's status from your computer, tablet, or smartphone. With mobile link, you'll always know what is happening with your Generac generator.

## Mobile **Link** Installation Plus 1 Year of Monitoring

# \$499

### Key Features:

Monitor your generator status directly from your smartphone, no matter where you are.

Get notified immediately when your generator is running, exercising, or ready for routine maintenance.

Allow our qualified Generac service technicians to monitor and maintain your generator 24/7.

For more information, please ask your Generac technician or contact the office at 508-746-0636
